# Venkateswara Narra

Software Development Engineer @ Veritis Group Inc | Master of  
Science  
Coppell, Texas, United States

## Summary

I'm a full stack developer who enjoys building real-world applications that are both smart and reliable. Over the past few years, I've worked on projects across healthcare, finance, and retail—handling everything from backend APIs and data pipelines to frontend dashboards and ML integrations. I like working across the stack and figuring out how all the pieces fit together to make things work smoothly.

I recently completed my Master's in Computer Science at George Mason University, where I got to dive deeper into system design, AI, and hands-on software architecture. I'm always exploring new tools, learning by building, and staying curious about what's next in tech.
